PhytoTechnology Laboratories®

AL WINDHING TO SERVE THE PROPERTY OF THE PROPE

Helping to Build a Better Tomorrow through Plant Science™

Product Information Sheet

C346 Carbenicillin, Disodium Salt

Synonym: α-Carboxybenzylpenicillin, Disodium Salt

CAS: 4800-94-6Formula: $C_{17}H_{16}N_2O_6SNa_2$ MW: 422.36 g/mol

Properties:

Form: Powder

Appearance: White to Cream Powder
Application: Plant Tissue Culture Antibiotic

Solubility: Soluble in Water

Storage Temp: 2-8°C Storage Temp of Stock Solution: -20°C

Application Notes:

Carbenicillin is a derivative of penicillin with a mode of action similar to benzylpenicillin. It is the most commonly used antibiotic for the elimination of *Argobacterium tumefaciens* due to its relatively low toxicity for a wide range of plant species. The typical concentration range for use is 100-500 mg/L in plant tissue culture. A concentration of 500 mg/L is recommended to achieve microbe toxicity; however, concentrations up to 1000 mg/L have been reported in plant tissue culture literature.

Please Note: While *Phyto*Technology Laboratories® tests each lot of this product with two or more plant cell/ tissue culture lines, it is the sole responsibility of the purchaser to determine the appropriateness of this product for the specific plants that are being cultured and applications that are being used.
