The material described in this certificate was manufactured in the United States of America and contains components that are synthetic, plant- and animal-derived. The plant-derived components are agar manufactured from marine algae (seaweed) and glucose, which is so highly refined that it is considered to be synthetic from plant (corn of US origin) starting material. The animal-derived component is hydrolyzed casein from bovine milk of New Zealand and/or Australia origin. It was hydrolyzed with a Porcine-derived enzyme of US/Canadian origin.

PhytoTech Labs Inc. provides the above information intended to be used only as a guide to the appropriate handling of this material by a properly trained person.
