The material described in this certificate was manufactured in the United States of America and contains components that are synthetic, plant- and animal-derived. The plant-derived components are agar manufactured from marine algae (seaweed) and glucose, which is so highly refined that it is considered to be synthetic from plant (corn of US origin) starting material. The animal- derived component is casein from bovine milk of Australian origin. It was hydrolyzed with a Porcine-derived enzyme of US origin.
