

## Product Information Sheet

---

# F2950 Fluorescein Diacetate (FDA)

Synonyms: 3,6-Diacetoxyfluoran; Di-O-acetylfluorescein  
CAS: 596-09-8  
Formula: 416.38  
Mol. Weight: C<sub>24</sub>H<sub>16</sub>O<sub>7</sub>

### Properties

Form: Powder  
Appearance: White to Yellow  
Application: Biological Stain, Histology  
Solubility: DMSO, Ethanol, Acetone  
Storage Temp: -20 to 0 °C  
Typical Working Concentration: Varies with application, should be determined by the end user.

### Application Notes

Fluorescein diacetate is used to identify viable cells, which will emit a greenish fluorescence.
